

# EGG PARASITOID WASP - *Anastatus fulloi*

Order: Hymenoptera Family: Eupelmidae

- Litchi stink bug, an invasive pest, was found in recent years that reduced the yield of litchi and longan.
- *Anastatus fulloi* is a native egg parasitoid wasp in Taiwan.
- To develop a mass production system, we demonstrated that eggs of a moth *Samia cynthia* can serve as a substitute host for mass producing.
